DETAILED ACTION

Acknowledgment

1. This Office Action is responsive to the Amendment filed on 5/8/2007.

Accordingly, claims 1-30 in this application.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 2, 11, 12, and 25-28 are rejected under 35 U.S.C. 102(e) as being anticipated by Taylor (US 6,539,006).

Regarding claims 1, 2, 11, 12, and 25-28, Taylor, as shown in figures 1 and 2, teaches a method and apparatus for reducing interference in the mobile station during the idle state comprising repeatedly monitoring and selecting the pilot channels which have the signal strength above the threshold and placing them into the ACTIVE SET and the corrected local channel (for the mobile station) will be produced based on the updated ACTIVE SET of the pilot signals.

See also column 2, line 1 to column 3, line 52 and column 5, line 6 to column 6, line 29.

Allowable Subject Matter

4. Claims 3-10 and 13-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. Claims 21-24, 29 and 30 are allowed over prior art of record.

Response to Arguments

6. Applicant's arguments with respect to claims 1-24 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References Sinnarajah et al (US 2003/0035393), Boettger et al (US 6,625,132), and Chen et al (US 2004/0180661) are cited because they are pertinent to the method and apparatus for reducing interference in a mobile station during idle or access state.
